Mobile Auction Management

Set up and modify auctions from your mobile device

Manage your entire auction without ever opening a laptop

- Create and edit items
- Send messages to guests
- Make updates on the fly

Liberate your team from laptop purgatory

We all know what it's like to hover over a laptop during an event. With Handbid, those days are over.

Handbid lets your team use mobile devices to manage check-in, get real-time auction stats, communicate with guests, add or edit items, and enter live bids and paddle raises. That way, you can make changes faster and be more attentive to guests!

Here's what Handbid lets you accomplish with a mobile device

- Check in and register guests
- Swipe guests' credit cards
- Add new auction items
- Manage livestreams
- Update existing auction items
- Broadcast messages to guests
- Enter live auction items

Be more attentive and responsive to guests

Who wants to be stuck at a laptop as the auction and donation appeals commence?

Managing a fundraising event from your mobile device isn't just about convenience – it's about being available to guests where they are, when they need you. Mobile auction management allows you to move around the room and make adjustments on the fly.

You'll get more done, faster. And your guests will have a better time.
