

Streamline your Safety and Project Management with Worx Safety and Simpro Integration

Integration Features

✓ Site Import

Import Simpro site names & location details into Worx Safety (manually or automatic). This ensures accurate site information across both platforms, simplifying project setup & updates.

✓ Synchronise Contacts

Easily send account invitations to Simpro employees, contractors & site contacts, ensuring quick onboarding and seamless access to essential tools and information for everyone involved.

✓ Digital Form Submissions

Seamlessly automate the delivery of Worx Safety digital form submissions to your Simpro account, ensuring that all documentation is consistently available and up-to-date for all sites.

✓ Completed SWMS

Automatically synchronise completed SWMS from Worx Safety to Simpro, creating a streamlined process for maintaining up-to-date safety documentation and ensuring all work activities are compliant before starting on site.
