

# HIPAA-compliant task management and workflow automation

Capture, assign, track and complete administrative tasks that get healthcare done.

Dashboard interface showing a user profile (Hello, Anika), search bar, and a table of tasks. The table lists tasks with columns for SUB, PATIENT, STATUS, DETAILS, and ASSIGN.

| TASKS   | SUB | PATIENT         | STATUS      | DETAILS | ASSIGN |
|---|-----|-----------------|-------------|---------|--------|
| <input type="checkbox"/> Remicade new start                   | 2   | Rebecca Sampson | In Progress |         |        |
| <input type="checkbox"/> Abnormal lab values, needs call back | 1   | Rebecca Sampson | Planned     |         |        |
| <input type="checkbox"/> Psych referral needed ASAP           |     | Rebecca Sampson | URGENT      |         |        |
| <input type="checkbox"/> Reill request for Humira             |     | Rebecca Sampson | Planned     |         |        |
| <input type="checkbox"/> Needs call back re: scope results    |     | Rebecca Sampson | In Progress |         |        |
| <input type="checkbox"/> Rheumatology referral (Dr. Dedu)     |     | Rebecca Sampson | Waiting     |         |        |
| <input type="checkbox"/> Schedule repeat colonoscopy          | 2   | Rebecca Sampson | Planned     |         |        |
| <input type="checkbox"/> Follow up with TFTs in 3 months      | 3   | Rebecca Sampson | Future      |         |        |

Less admin inefficiencies

“Dock Health is an easy way for us to track steps in client onboarding, improve communication among team members, and break down our many systems into simple steps.”

Dr. Karen Pavlidis, Child and Teen Solutions, Seattle, WA

# The only solution made specifically for healthcare

As providers ourselves, we understand the challenges of patient care and the workflows of a busy practice.

## HIPAA Compliant

Dock Health is foundationally HIPAA-compliant, for everyone, at every level. No expensive enterprise plans required.

## Tasks & Reminders

Say goodbye to sticky notes and never drop a ball again with our powerful and intuitive task management tools.

## Automations

Time-saving automations take care of manual or error-prone tasks for you—so you can get back to what you do best.

## Chat & Messaging

Collaborate across teams and organizations with secure HIPAA-compliant chat and messaging.

## Patient Profiles

Improve continuity of care by assigning patient profiles to specific tasks and workflows.

## Integrations

Securely connect Dock Health to your EHR, intake tools, and other non-healthcare applications.

## Files

Import files or sync directly with your Google Drive account for seamless team collaboration and handoff.

## Task History

Keep everyone on the same page with individual task edit history, audit trails, comments, attachments, and more.

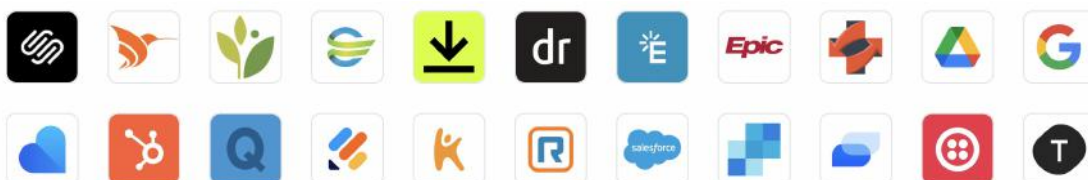

## Analytics

Use Dock Health's analytics to identify bottlenecks, spot areas for growth, and optimize your practice management.

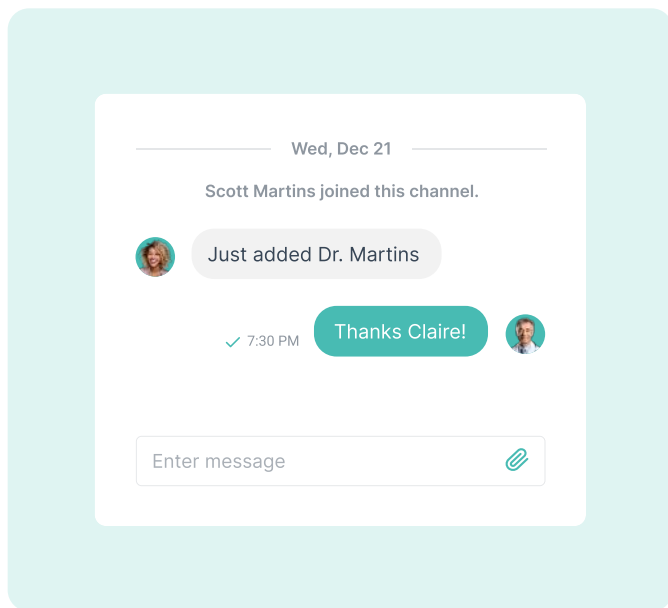

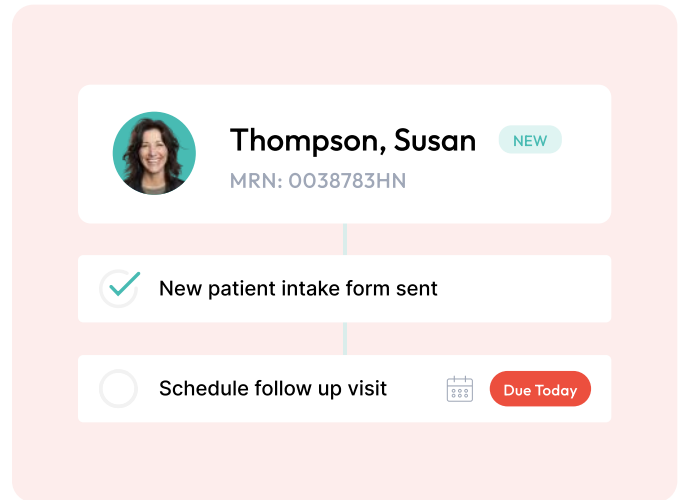

## Integrate with the tools you're already using

Dock's suite of integrations and automations delivers maximum efficiency by reducing the administrative manual labor of a practice.

# Bring all your tasks, tools, and teammates together

Your to-do lists just got smarter. Dock delivers process improvements, collaboration and efficiency for every member of the care team.

# Drive cross-team efficiency

Manage patients across providers, teams, and organizations. Easily share patient information from within Dock Health while keeping sensitive information secure.

# Automate repetitive tasks and manual workflows

Use Dock's Workflow Library to get started with customizable templates that fit your needs. Integrate with your EHR and outside systems to automate time-consuming or error-prone tasks.
