

Priority Engine™ is the Fastest Path to the Deal

Find real technology buyers when they're ready to buy

TechTarget's Priority Engine is the only solution that can identify, prioritize and engage the real people at your target accounts when they're researching solutions like yours.

Delivering the industry's most actionable sales intelligence, Priority Engine captures relevant buyer behavior and uncovers the insights your sellers need to generate more opportunities and close them faster.

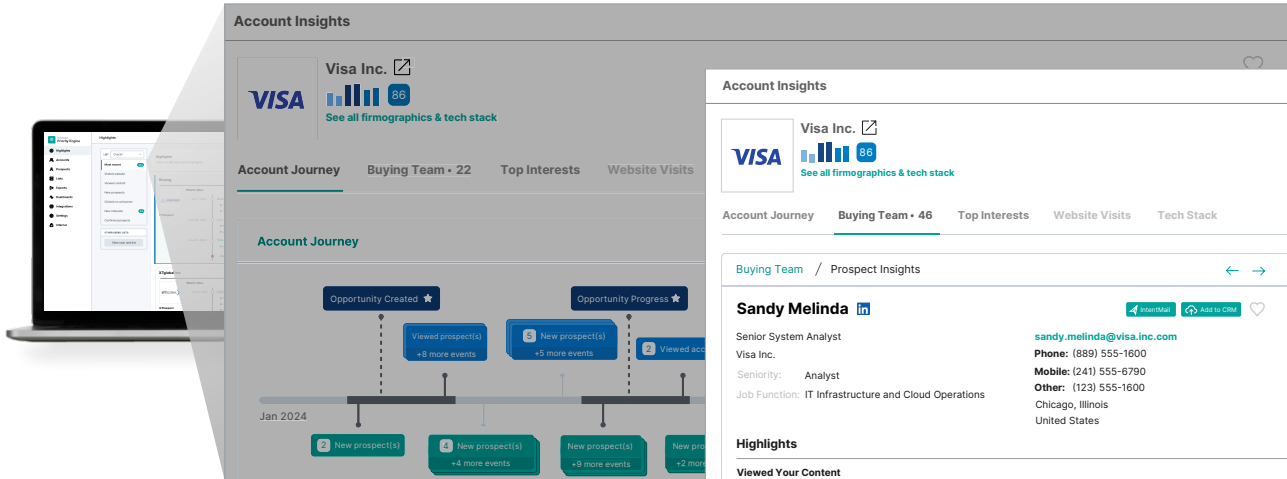

Active buyers. Prioritized accounts. Relevant insights. One simple solution.

	Conventional Sales Solutions	The TechTarget Difference
	Contact Providers can give you contact details for employees at your target accounts, but they don't know who is looking to buy your products.	TechTarget knows the exact people at your target accounts who are researching solutions like yours – right now.
	Intent Providers can tell you the accounts researching relevant technology on the websites they're scraping, but they don't know who is doing the research.	TechTarget knows the accounts and the REAL people displaying relevant purchase intent in your technology market segment.
	Social Networks can give you insight into a prospect's personal interests and career goals, but don't know their tech challenges or planned investments.	TechTarget knows the prospect's tech interests, upcoming projects, and competitive research to help inform call prep and personalize outreach.

“ Our sales team depends on Priority Engine to build pipeline – no other tool can compete with it.”

Bryan Frankel, *Global Sales Director, LANSA*

Key features & benefits

Take the guesswork out of prospecting

Priority Engine connects you to the key members of the buying team and prioritizes them based on their level of relevant research activity. We provide a massive audience of registered tech buyers to help fill sales cadences with thousands of responsive, GDPR-compliant prospects.

Focus on the accounts and people that matter

Priority Engine ranks the accounts and people in your territory based on the level of relevant research activity on the TechTarget network – and with you, including if they've visited your website, downloaded your content or clicked on your banners. Visualize accounts' journeys at a glance to understand activities taken with TechTarget as well as your team.

Flexible fit within your systems and workflows

Priority Engine contacts and insights can be accessed in-tool, within your CRM and in sales engagement platforms. Direct CRM integration automatically syncs account territories and lists from 1st- and 3rd-party intent providers and ABM lists, displays relevant prospect insights on all lead and contact pages and gives sellers the ability to add hot prospects to your CRM with one click.

Accurate and actionable contact data

TechTarget prospects must pass rigorous data qualification tests before they're added to Priority Engine. All phone numbers, email addresses and job titles are validated and continuously cleansed to ensure contact data is accurate and up-to-date.

Prospect-Level Intent™ insights make real personalization possible

Priority Engine allows sales to have more meaningful conversations with prospects by providing insights that are proven to generate meetings, including their personal tech challenges and pain points, if they're downloading content from your competitors and the solutions they already have installed.

Helping you succeed from day one

Value-added consulting services help with onboarding, implementation and ongoing sales training to ensure your team is getting the most out of your Priority Engine investment.
