

The Bryq Assessment

Measuring what makes a **true difference** for success

Lengthy, boring assessments often **discourage candidates** from completing them. Similarly, their complexity and focus on irrelevant aspects **deter recruiters** from using them.

The Bryq Assessment is a **unified, chatbot-based** assessment capable of identifying the ideal job-person fit in just 14' **for any position**. This makes it a must-have tool for hiring top talent.

What we measure

1 **Cognitive** ability

2 **Personality** traits

3 Work-related **competencies**

*This combination has been proven to be the most valid predictor of future job performance**

*Harvard Business Review
