

INTRODUCING

Your New Superhuman Teammate

The next generation of buyer engagement. 1mind deploys Superhumans **that engage your buyers the way your best rep would — 24/7, at scale.**

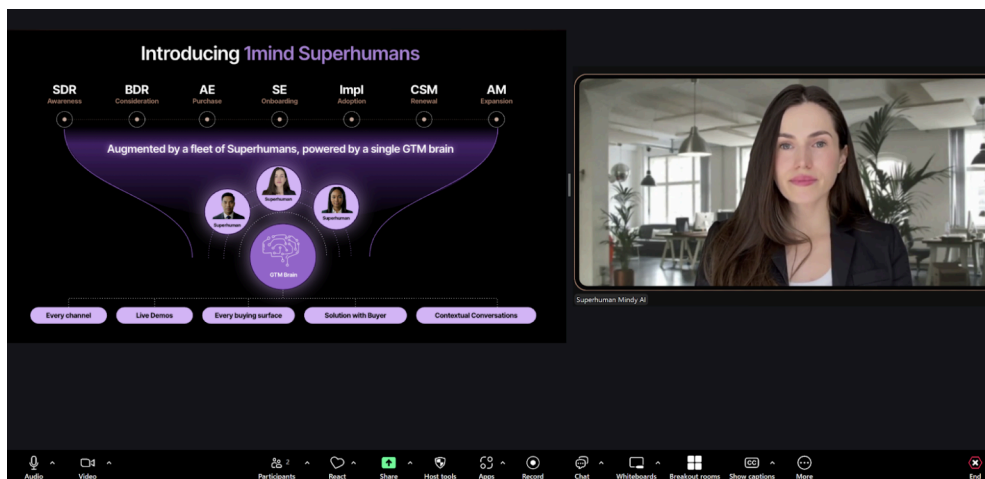

WHAT IS A 1MIND SUPERHUMAN?

A 1mind Superhuman is an AI-powered digital teammate who helps companies grow and scale while delivering human-like buyer experiences. Superhumans qualify leads, answer complex product questions, deliver interactive demos, handle objections, book meetings, build value models, and onboard customers.

They understand context, adapt to buyer questions in real time, share relevant content (not just links), and guide buyers through their journey with empathy and intelligence. This is a fundamentally different approach that enables you to bring your website to life in a new way, built AI-native from the ground up.

Superhumans Across Your Buyer Journey

<p>Website Inbound</p> <p>Engages inbound buyers in real time, runs demos, qualifies intent through live discovery, handles objections, and books meetings with AEs.</p>	<p>Ride-Along Solutions Engineer</p> <p>Joins sales calls and brings deep product and technical expertise to live calls and tailored demos, like your best SE, every time.</p>
<p>PLG In-Product Guide</p> <p>Guides onboarding and feature discovery in-product to drive activation, adoption, and long-tail engagement.</p>	<p>Customer Success</p> <p>Provides 24/7 human-like support, training, implementation and ticket deflection to drive adoption and expansion.</p>

See it for yourself.

Why 1mind

<p>Revenue</p> <p>Shorten sales cycles, increase ACV, and maximize ROI on existing web traffic and marketing spend. Every visitor gets your best pitch, instantly.</p>	<p>Efficiency</p> <p>No time or capacity limits. Scale pipeline generation, technical support, and customer success without adding headcount. Lower CAC while doing more.</p>
<p>Expertise</p> <p>Trained on your content, fluent in your product. Handles nuanced buyer questions, adapts tone, shares contextual content (not just links), and delivers live demos.</p>	<p>Reliability</p> <p>SOC 2 Type II certified. Deterministic guardrails control what it says; generative AI controls how. Multimodal (voice, video, text). No burnout, no inconsistency.</p>

How It Works

01 Train

Share your content: pitch decks, FAQs, product guides, case studies. Everything you'd give a new hire.

02 Configure

Define goals, persona, and flows. Our team designs it with you in 2–3 workshops.

03 Test

Thousands of simulated conversations. Your team validates across hundreds of scenarios.

04 Deploy

Go live in ~4 weeks. Dedicated CSM optimizes performance week over week.

Built for Trust

Your Superhuman only discusses topics it has been trained on using your approved content. A deterministic layer controls *what* it says; a generative layer controls *how* it says it naturally. If a question falls outside its knowledge, the Superhuman pivots to what it can help with, or books a meeting with a specialist.

Connects With Your Stack

Connects to your CRM, marketing automation, enrichment, scheduling, video, and sales tools, including Salesforce, HubSpot, Marketo, Zoom, Microsoft Teams, ZoomInfo, ChiliPiper, Zoom, Clari + Salesloft, + more.

Trusted By Teams At

HubSpot, LinkedIn, Pipedrive, Nutanix, Seismic, Samsara, New Relic, Tealium, ZoomInfo, Alteryx, Boston Dynamics, Coupa, Freshworks, PagerDuty, Workiva, Quickbase, Pavilion.

25% increase in revenue closed 133% increase in signups	2x outperformance of pipeline target	2x conversion lift over chatbot	Over 100% uplift in conversion from visitor to trial	5x more revenue in 1/2 the Time!
