Problems

Reliance on LinkedIn has led to limited talent pools

Limited to one data source

Recruiters relying on LinkedIn are restricted to one primary data source, overlooking hidden talent available elsewhere.
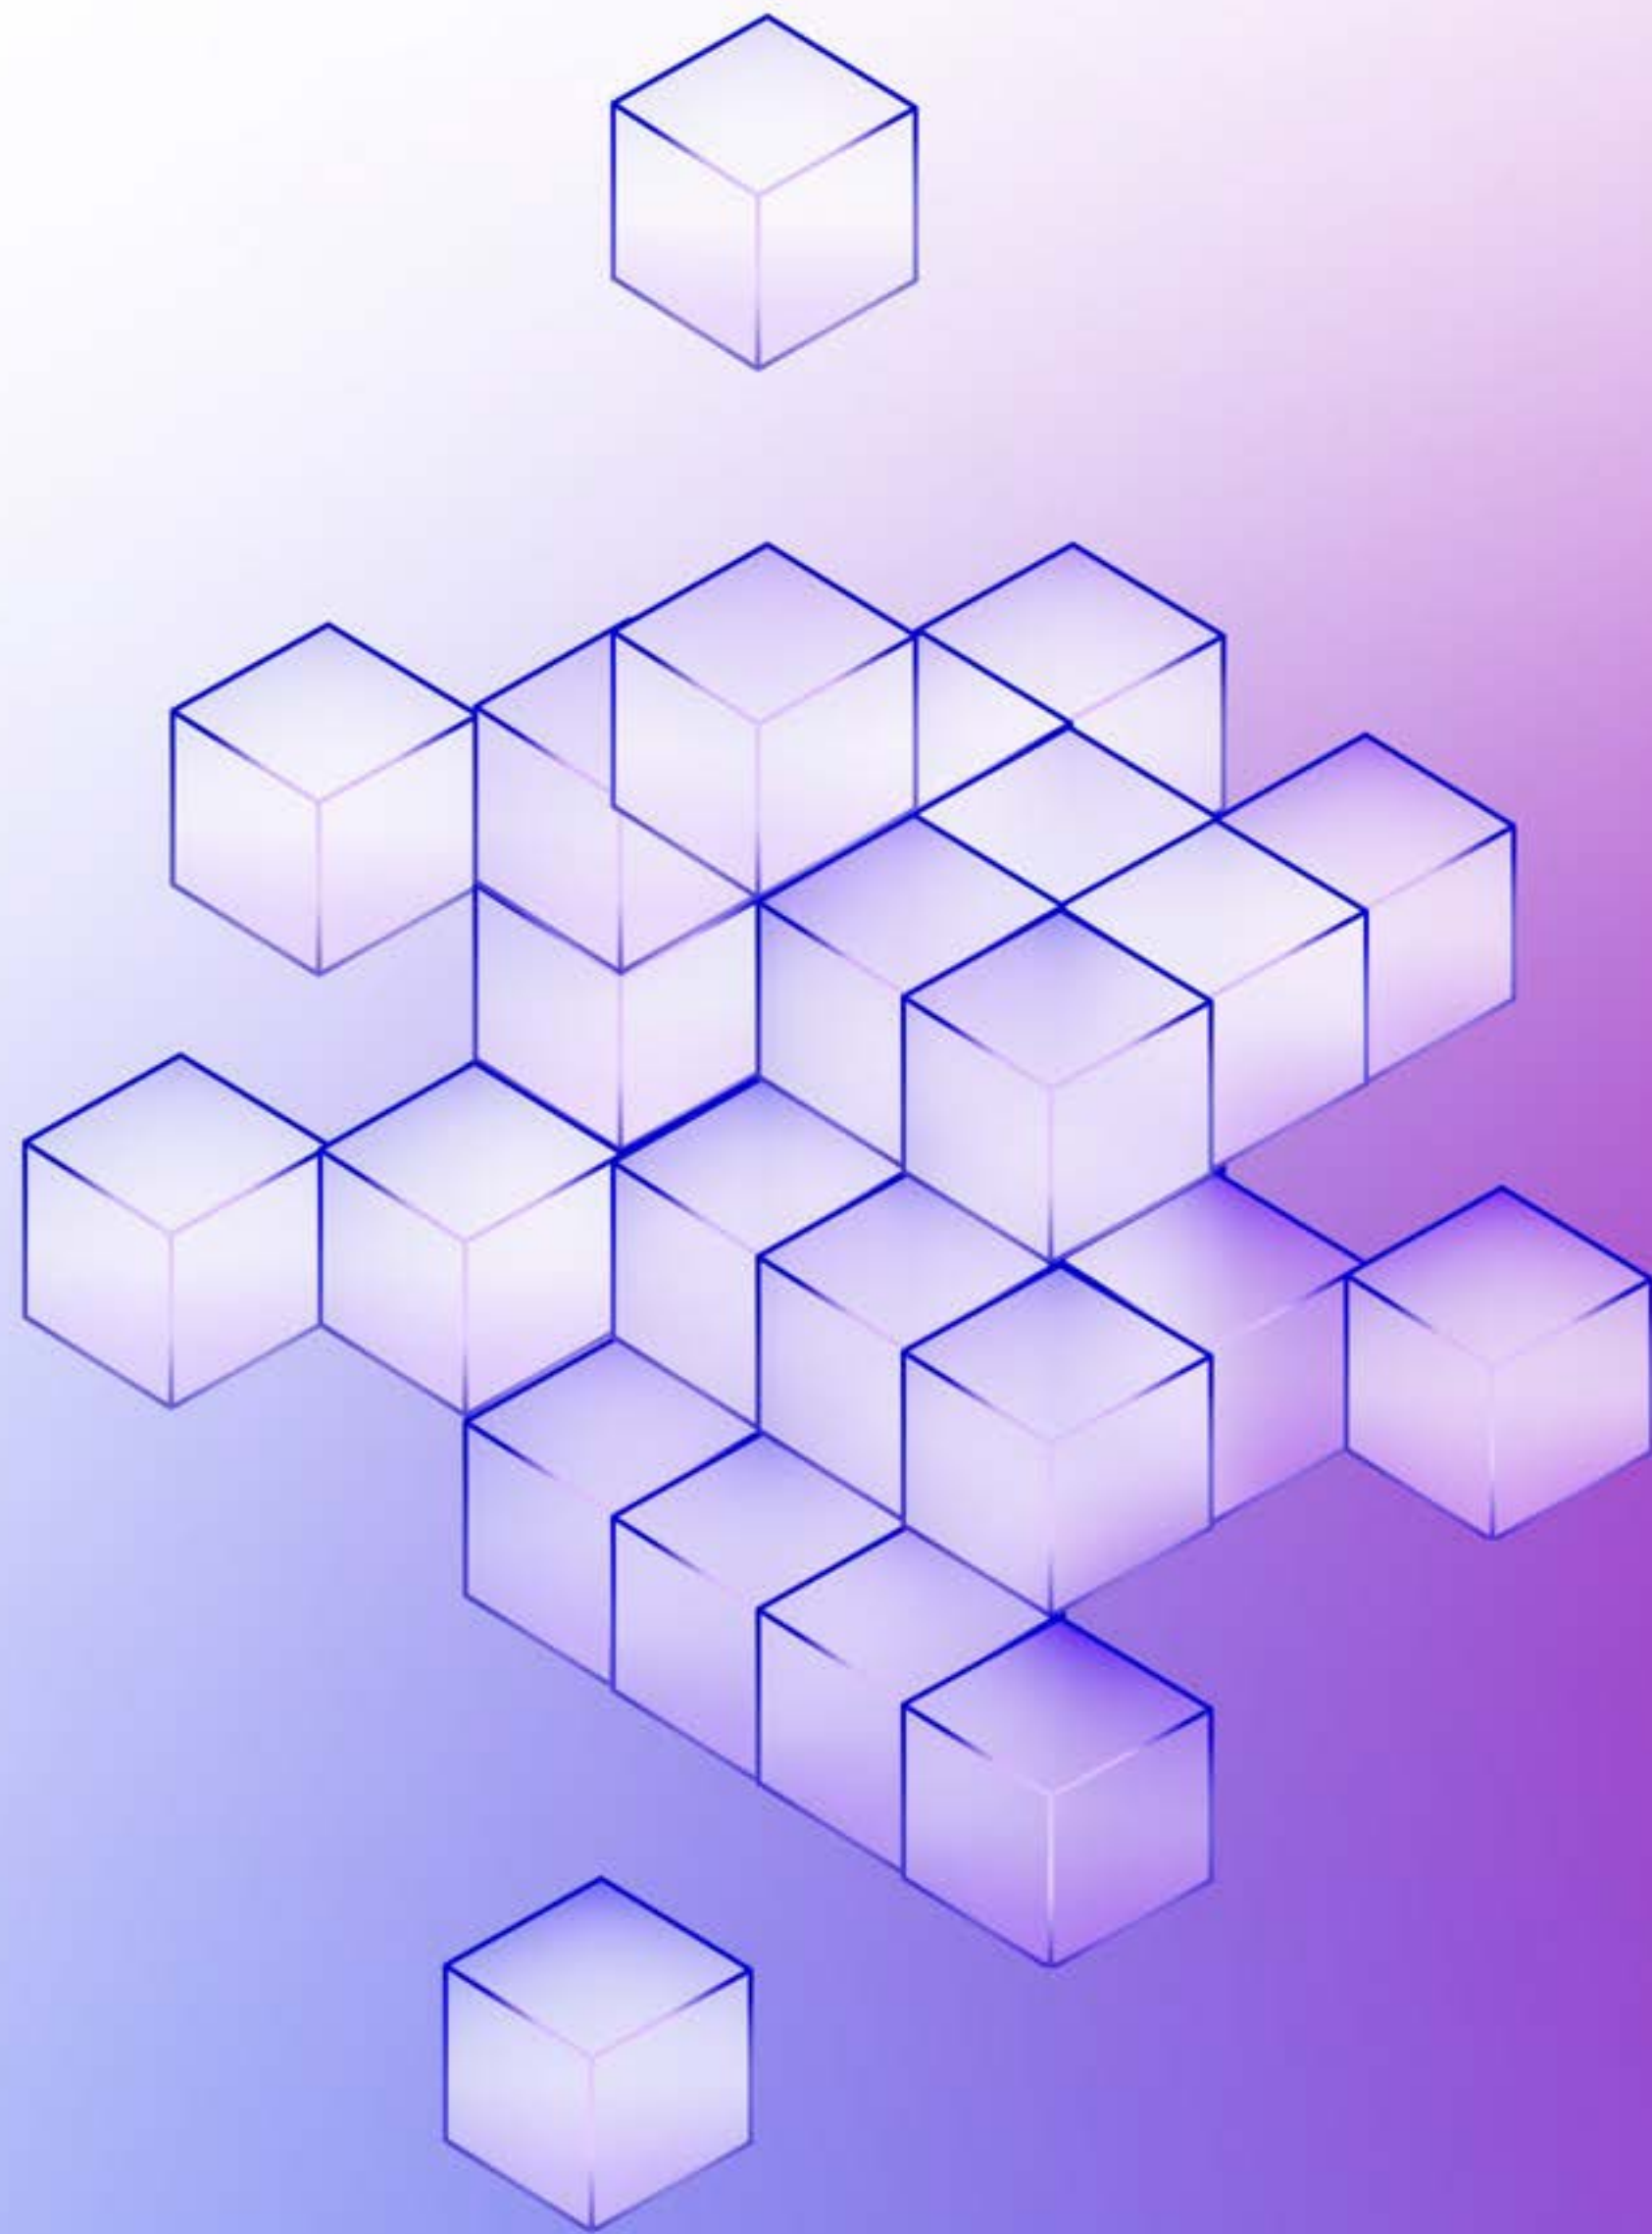

Small talent search pool

Traditional platforms offer limited talent pools, resulting in incomplete sourcing efforts and suboptimal search outcomes.

Crowded talent marketplace

On LinkedIn, 1 in every 20 profiles belongs to a recruiter. This creates a highly competitive environment.

Traditional search processes have become inefficient

Boolean logic is time consuming

Constructing lengthy Boolean strings is a tedious process for recruiters, consuming valuable time and resulting in inefficient outcomes.

Complex filters make search difficult

The abundance of filters forces recruiters to spend more time configuring searches than actually finding matching candidates for the company.

Profiles require manual, time intensive review

Reviewing hundreds of profiles manually costs recruiters significant time and effort, slowing down the hiring process.

Solution

Juicebox is the all-in-one solution for talent sourcing

PeopleGPT (Search)	Search on Juicebox is powered by PeopleGPT, the world's first people search engine that uses natural language. Describe who you're searching for and find the perfect match. Benefit from a diverse selection of over 30 data sources.
Talent Insights	View 15+ charts on top of your talent pool: location, employers, job titles, skills, and more. Refine your search and confidently double-down into high-potential talent pools.
Email Outreach	Maximize candidate engagement with AI-powered email campaigns that reflect your unique voice. Personalize messaging at scale using templates and AI commands, boosting response rates by up to 40%.

The first recruiting solution with AI at its core

| Topic	Status quo	AI driven solution
Setting up a search	Carefully designing a large filter-based query, evaluating each filter individually and working with interdependencies	Search based on natural language
Ranking results	Scrolling through hundreds or thousands of potential candidates to screen for a fitting match	Rank candidates with semantic criteria
Generating Insight	Using rule of thumb to draw conclusions about the talent pool, or purchasing an insights-only solution	Comprehensive Talent Insights
Reaching out to talent	Either reaching out to all candidates individually in a highly time consuming way, or sending generic email campaigns	Personalized AI Email campaigns

PeopleGPT
Unlock talent beyond Boolean's reach

Search in natural language: Simply describe who you are looking for, and let AI set the filters for you.

Evaluate in batches: Define what criteria are most important to you and receive a reasoned match percentage for each candidate.

Smart Rank candidates: Use AI to re-rank your search results – stop the endless scrolling for the best candidates .

Set filters with AI

Hi Kayla Victoria,

I'm David from Juicebox. Your profile stood out to me as a strong fit for our open software engineering role. Your experience building search APIs on Apache Lucene aligns closely with a major project we're kicking off here at Juicebox.

Here is the job description as well as our company's "About Us" page [LINK]. Interested in learning more? Please send me some times you'd be available to chat this week.

I look forward to hear from you!

Best,
David

Three unique advantages set Juicebox apart

#1

Improved talent density

Juicebox improves your talent pool, delivering you more, higher quality matches faster thanks to AI.

#2

Increased hiring speed

By relying on natural language for search, recruiters spend less time on sourcing and vetting, helping to fill roles fast.

#3

Become a strategic partner

Gain a holistic overview over your talent pool with Talent Insights, allowing for a better collaboration with hiring managers.

Juicebox

Customers love our product – and you will too!

> "I **highly recommend this product** for anyone in need of top-tier engineering talent. It quickly surfaced candidates I haven't come across in the past. If you're seeking a **game-changing solution**, look no further."
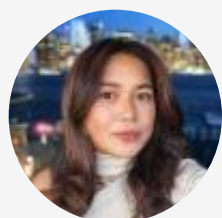

Veronica Parado
Sr. Technical Recruiter at Census

> "Juicebox has **significantly increased my productivity**. Its intuitive interface and seamless integration with my workflow make brainstorming search strategies and **identifying top profiles** a breeze."
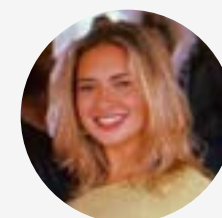

Brie Kennedy-Beal
Sr. Technical Recruiter at Assured

> "**Super useful** for scanning through hundreds of profiles. **Massive time saver** when you can avoid reading through profiles of candidates that are clearly not a fit."

Sarup Banskota
CEO at Codecrafters
