

Milliman CareFlowIQ

Industry's best medical record retrieval & insights solution

Unlocking all relevant patient history
trapped in legacy formats

- » Saves time and reduces costs of patient onboarding
- » Eliminates complexity of patient data migration
- » Uncovers care gaps and health trends
- » Enables risk stratification to provide more efficient care

The CareFlowIQ solution:

Granular
clinical details

Milliman
analytics

Superior risk stratification
and better patient care

Unlocking patient history trapped in legacy formats

Insights empower better patient care

- » Identifying patients with the highest health risk
- » Monitoring patient health with real-time information
- » Tracking how your clinic is providing better care
- » Measuring compliance of providers action plan

Multiple means of tracking an employer group's health risk

- U.S. Preventative Services Task Force (USPTF)
- Milliman Advanced Risk Adjusters (MARA)

CareFlowIQ uses USPTF to identify preventative care gaps and MARA to evaluate current and projected cost of care versus the norm.

CareFlowIQ was developed from the start to transform disjointed, real patient data into a comprehensive whole-patient-view in minutes. Easily accessible through an intuitive user interface or an API that integrates with your EHR. It provides superior analytics and insights for better patient care.

Milliman CareFlowIQ

Retrieval & insights... Nobody does it better
